Data generated by Zielke Research GmbH on behalf of Bund der Versicherten e.V.

Companies classified by memberstate and alphabet.

**Explanation:** **Green:** BdV assesses the company being appropriately well endowed.

**Yellow:** BdV assesses potential improvements for the company.

**Red:** BdV assesses need for action referring to the company.

**Grey:** BdV judges the solvency as unreasonable high with no bad effect on policy holders

\* "VA" = Volatility Adjustment

\*\* To calculate the ratio without surplus fund, due to not enough information we didn't apply an adjustment to avoid the double counting of the French PPE impact in the calculation of the transitional
